

Sample Handwritten-Style Answer Sheet

Answer 1

Photosynthesis is the process by which green plants prepare food using sunlight, carbon dioxide and water. Chemical equation: $6\text{CO}_2 + 6\text{H}_2\text{O} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{O}_2$

Answer 2

An atom consists of a central nucleus containing protons and neutrons, while electrons revolve around it.

Answer 3

Newton's Second Law states that Force = Mass $\times$ Acceleration ($F = ma$). Example: A football accelerates when kicked.

Answer 4

The respiratory system helps humans inhale oxygen and exhale carbon dioxide. Major organs include nose, trachea and lungs.

Answer 5

Renewable energy sources can be replenished naturally, such as solar and wind energy. Non-renewable sources include coal and petroleum.
